P.S.

We kindly inform you that Gold & Bronze n. 14 and 15 tend to fade on surface if exposed to direct light sources. A gentle brush on tester makes the colour turn to its original shade. For this reason we invite you not to expose them to direct sunlight, such as in shop windows.

The surface pattern of Gold & Bronze n° 5, 7, 18 and 19, tends to become blurred when people touch them with their fingers to test the colour, thus losing the original design. Here too, all you need do is brush these gently to restore the original shade of colour.
